PROJECTS

Doctor Find

React, Redux Toolkit, Bootstrap, MUI, PWA

📅 2023

- Developed a system for online doctor appointment booking and payment processing. Doctors or their secretaries can accept the booking and set a specific time for the patient's visit.
- Patients receive SMS notifications with the details of their appointment time. Doctors receive alerts about pending booking requests that need approval.
- Doctors can access reports detailing the number of patients served, categorized by gender and age.
- Users can rate their doctors and leave comments on the doctor's profile.
- Doctors can update their personal information, including qualifications and experience. Patients can view and manage their booking history and modify their personal details.
- todawini.com

Insurance Company

React, React Query, Tailwind, MUI, Node.js

📅 2023

- Created a website for managing insurance policies and client information. Allows companies to add insured employees and manage their data.
- effortless-city-364019.web.app

Movie Viewing Site

React, Redux Toolkit, Bootstrap

📅 2022

- Developed a website for viewing and searching movies.
- Ez-Movies

Dashboard in Delivery System

React, Redux Toolkit, Bootstrap, MUI

📅 2022

- Created a dashboard for managing drivers and pharmacies. Features include adding, deleting, or suspending users and assigning orders.

Educational Platform

React, React Query, Tailwind, Flowbite

📅 2024

- Developed an educational platform for managing online courses and student information.
- wesam-education.web.app

EDUCATION

B.S in Information Technology

Taizz University

📅 2019 - 2023

Graduated with a very good grade

Chat App

[Next.js](#), [Node.js](#), [Tailwind](#), [Socket.io](#)

📅 2024

- Developed a chat application that allows users to create accounts and search for other registered users to start chatting with them.
- Users can send text messages, voice messages, images, and videos.
- The application shows the online status of users and indicates when someone is typing or has received a message.
- Users can edit their personal information.
